Sale a bargain buyers' delight

FOR four hours only, Metalcorp will be holding a clearance sale at its Wagga premises on Dobney Avenue.

Metalcorp will be offloading old stock – many returned goods which are slightly damaged – at significantly reduced prices.

The items include steel powder-coated fencing and gates, quality second grade offcuts being sold at scrap metal prices and many other products.

They are being sold as is – palletised items can not be split up.

"A lot of the items have come back from the customer for one reason or another and will be for sale at a far reduced rate," Metalcorp branch manager Colin Reed said.

"For example, we have roller doors which have a bit of paint scraped off them.

"The clearance sale is of everything that is 'not quite right'."

There are also aluminium products which have been slightly damaged by water.

Mr Reed said it would only be a certain section on site which would have the discounted items – not undamaged stock – and all offers would be considered.

The sale will start at 8am tomorrow at 55 Dobney Avenue and finish at noon.

"It might not suit everybody, but there's every chance people can pick up a bargain like a powder-coated fence and gate which was ordered in the wrong size so we couldn't send it back to the

Metalcorp has all the right steel for farmers

RURAL fencing, gates and stockyards are Metalcorp's "bread and butter", so customers can have confidence in a superior product when making an inquiry.

Based on Dobney Avenue, Wagga, Metalcorp specialises in agricultural metal products.

Sheep and cattle yards can be designed specifically to farmers' needs or built off a plan.

Metalcorp Wagga sales supervisor Tim Armstrong said the company also provided a delivery service to farmers and residential clients.

The Wagga business covers to as far west as Hay and Hillston, north to Forbes and west to Gundagai and Tumut.

Sales staff are also available to visit on farm to ensure the right products are supplied to meet the landholder's needs. Mr Armstrong, who joined the company last October, said farmers had been making plenty of inquiries about fencing products since the end of the sowing season.

"There's fairly constant inquiry throughout the year except during sowing and harvest ... it usually slows down a bit then," he said.
