

# National Water Week

## Modern and efficient

**BUNGENDORE Water Bores** was established in 1989 when Danny Hill commenced operations in Bungendore, southern NSW, sourcing water for local property owners.

The business is still owned and operated by Danny Hill.

Through word of mouth and expertise, Bungendore Water Bores has expanded to cover the Southern Highlands, Southern NSW and Sydney regions.

Bungendore Water Bores pride themselves on

delivering exceptional customer service.

No matter how remote your property, when it comes to locating a water source, Bungendore Water Bores will do whatever it takes, even drive through a river, to

deliver their specialised service.

Bungendore Water Bores are committed to sustainable industry practices and use only modern, environmentally efficient drill rigs and equipment.

# Sustaining our most precious liquid asset

THE formation of the larger electricity distributors in 1995 precipitated a review of water supply administration.

As a result, Riverina Water County Council was formed on 2nd May 1997, specifically for the purpose of water supply and operates under the provisions of the Local Government Act 1993.

Drinking quality water is supplied to all customers continuing a tradition of over 60 years of high service standards by a leading and innovative utility service organisation.

The County District covers an area of approximately 15,400 square kilometres and contains a population of approximately 67,000 people.

An estimated 60,000 people are provided with water through some 26,000 service connections.

The location and development of groundwater sources has been utilised over the last 30 years, and bore water now supplies three quarters of the total Riverina Water production.

Riverina Water should be seen as locally owned.

It operates within the Local Government System on a non profit basis and is not required to pay a dividend to any other body.

It is required to pay some state and federal taxes including the recently increased licence fees for river and underground water.

Apart from that all income is used to meet operating, construction and replacement costs of a supply system valued at around \$100 million.

for fire fighting and some other unconnected consumers.

National Water Week is dedicated to raise community awareness about current and future water issues and to encourage the community to take action to protect our vital water sources.

It's also a celebration of water achievements in painting a sustainable future for generations to come.

This year, National Water Week will focus on the importance of liveable communities on a national scale, in which sustainable water management is a key component.

National Water Week will look to decision makers and the community to spark behavioural change and to ensure water is a top priority.

**INTRODUCING**

## RIVERINA WATER LAWN REPLACEMENT WATER EFFICIENCY PROGRAM

### 'BEYOND THE NATURE STRIP'

Following the success of the Riverina Urban Nature Strip Rebate Scheme, Riverina Water would like to introduce the 'Beyond The Nature Strip' booklet.

This booklet will provide you with information on water efficient gardening, a guide to replacing your lawn & useful water efficiency tips.

With spring upon us Riverina Water encourages residents to continue to think sustainably & consider replacing some lawn around the home.

Visit [www.rwcc.nsw.gov.au](http://www.rwcc.nsw.gov.au) for an electronic version or call 6922 0608 to request a copy of the booklet

## Family owned expertise

WHEN there are so many drilling companies available, why would you choose CBJ Drilling Services?

A water bore can add value to your property and with reduced rainfall over previous years, groundwater is a very valuable commodity and CBJ Drilling Services can help you attain this.

They are a family owned and operated company with more than 50 years combined experience in the construction of water servicing New South Wales.

CBJ Drilling Services are fully insured and their workmanship is guaranteed.

They offer an obligation free site inspection and drilling by a class 6 driller.

Before drilling, clients must obtain approval from the NSW Office of Water, the current cost of a bore licence is \$241.83.

Now is an ideal time to consider your water requirements for the summer.

Licences can be approved within a matter of weeks and CBJ Drilling Services can then be on site within days to complete your bore.

Depending on weather and ground conditions, bores are usually completed within a day or two, keeping disruption and costs to a minimum and giving you time to set up your irrigation requirements before the heat really sets in.

Now is also a good time to consider a clean out and reline of your current bore giving it a new lease of life so it can continue for many years.

CBJ Drilling Services also has bobcats, excavators and tippers for hire.

Strathmerton Drilling is a family owned business with the latest state-of-the-art drilling equipment.

## Hands-on experience

STRATHMERTON Drilling is a family owned and operated company specialising in rotary mud water well drilling e service Victoria and southern New South Wales.

Based in northern Victoria, Strathmerton Drilling provides services from central Victoria to central NSW.

Operating a well maintained and efficient fleet of rigs with the capability

of drilling 5-24 inch in diameter and depths of up to 1000 metres.

Strathmerton Drilling prides itself on its hands-on approach and extensive experience in stock and domestic town water supply and large diameter irrigation bores.

Whilst maintaining the highest of quality and reliable service and ensuring a safe and healthy work environment.

## Dollars and sense

A WATER bore takes up only a small amount of space and because the water is stored underground, quite often it is not necessary to purchase storage facilities, which can save the landowner quite a lot of money.

Bore water does not evaporate, it is not easily polluted, it is not dependant on local rainfall to replenish the supply, there are no local council water restrictions or fees and bore water remains at a cool temperature.

Watermin Drillers are a family owned and run business, who have been drilling water bores for more than 50 years.

Watermin have a wealth of experience, and an extensive

data base of information from which to draw. They carry out on-site inspections to offer a complete service.

Imagine having your own private water source and how you could maintain your gardens without having to

rely on rain, or restrictions or fees from local Councils.

A water bore is a life long investment.
