Quality health care services to meet your individual needs

WAGGA'S St George Family Medical Centre was recently announced as the winner of the national AGPAL Solo General Practice of the Year Award.

The Australian General Practice Accreditation Limited (AGPAL) Awards recognise and reward quality within general practice which acknowledge and appreciate the dedication and continuing effort practices make towards quality improvement.

Dr Stephen Clark, Group CEO of AGPAL and Quality Innovation Performance (QIP) said that AGPAL received many outstanding nominations.

"The AGPAL General

Practice Awards recognise and reward the commitment that general practices make to quality improvement within a health care setting," he said. "St George Family Medical Centre's dedication to general practice goes above and beyond expected standards."

The Centre recently acquired a state-of-the-art German-made Dermoscope, which can perform full body length scans to detect potentially cancerous growths and also analyses individual moles and lesions.

Doctor Elizabeth Golez recently joined the General Practitioner team of Principal Doctor Adel Solomon and Doctors Medhat Dous and Elmien Bruce.

APGAL Group CEO Doctor Stephen Clark presented the Solo General Practice of the Year Award to St George Family Medical Centre Practice Manager Emma Solomon and Principal Doctor Adel Solomon.
