The dedicated staff, students and parents of Tirranna Public School work collaboratively within a happy and supportive educational environment to ensure that all students realise their full potential.

At Tirranna Public School you can expect quality literacy, numeracy and technology programs, as we make full use of our experienced staff and excellent facilities. Every student has access to a computer and our connected classroom keeps us in touch with our rural and regional schools, the Internet and the wider world.

Our personalised approach to education and smaller class sizes ensure that each child has the opportunity to thrive and be a successful learner. We provide a structured educational environment that effectively challenges enquiring minds, develops creativity with a focus on the Arts and the promotion of sporting skills. Our over-arching goal is to instil a positive approach to school life.

Through our unique small school network (GCoSS) we have created a vibrant student community. We provide opportunities to build social skills, foster friendships and develop student confidence that encourages friendships that last through primary school, high school and beyond.
