Experience and knowledge

BERNARD Maas is one of the co-managing directors of Goulburn Produce and Rural Supplies and the associated enterprises. Prior to the start of Goulburn Produce in 1983, Bernard's background was working on the family farm. He is keenly interested in irrigation systems and enjoys the hands on and customer contact of talking with clients about pumps, irrigation and the wide range of power equipment. He has a considerable understanding of what is needed when it comes to extracting water from bores, pumping from dams for stock, farm domestic

water supplies including tanks, supply lines, filters and fittings. With irrigation it does not matter whether you are chasing something for the home garden, a large vegetable patch, a few fruit trees or a commercial production orchard, vineyard or cropping enterprise, Bernard can draw on his knowledge to help you. Bernard is also the go to man when it comes to power equipment from chainsaws and brush cutters to ride on mowers and everything in between, including portable pumps. "If we don't have it in stock we will endeavour to source whatever it is our customers are

looking for," Bernard said. Outside of work Bernard is passionate about his cars. He also likes to spend time on the farm or spending time with the family. "You're bound to find things here that you will not get at other hardware or rural supply stores and I doubt that there would be too many businesses with the number of staff with the depth of experience ours have," he said. On Saturday Goulburn Produce Mitre 10 will have a number of industry specialists on hand to answer questions and talk about their company's products.
