

National Water Week

October 20th to 26th

Keeping it green!

THE recent September rains, although much needed, have caused havoc to our lawn areas. In a lot of cases we now have grass and weeds thriving. Keeping it Green to the rescue.

One of the most inefficient uses of water is our front and back yard lawns. The most effective way to save this water from the lawn is through the use of synthetic grass.

Synthetic grass was once known for how hot it could get. Not anymore. Cool grass is here.

Keeping it Green is the only Supplier of the Cool grass range in Canberra.

This grass is 30 per cent cooler than standard synthetic grass.

Along with the range of Prograss grasses, all designed and made here in Australia using the latest in technology, Keeping it Green is the first place to go to talk over your synthetic grass requirements.

Why should we use synthetic grass?

- It is dry in 30 minutes after raining
- Is not muddy, reduces carpet cleaning costs.
- Reduces dust and grass allergies
- Is perfect for pets, does not wear out
- Provides the perfect

lawn without the work
- Lasts for at least 15 years and is guaranteed for 10 years

Synthetic grass will enable you to take back your time to spend with family and friends, the things that are important in life.

We supply a full range of synthetic grasses that imitate Couch, Buffalo, Rye, and Fescue. We can also provide for your sporting interest, from putting greens to tennis courts.

Experience the benefits of a synthetic lawn with Keeping it Green.

Bungendore Water Bores

BUNGENDORE Water Bores is a family business, supporting the local, ACT and Southern NSW Communities for more than 20 years.

When you telephone Bungendore Water Bores, you will receive personalised service. Danny Hill, the founder and owner of Bungendore Water Bores, will arrange to meet you, inspect the site and divine the site.

If Danny doesn't think there is water on your block, he will advise against drilling. A hydrological study on the findings of the site can be arranged, if required.

Bungendore Water Bores fully guarantee all workmanship and

materials. All drilling works are carried out by licenced drillers.

The local business was established in 1989 when Danny Hill commenced operations in Bungendore, sourcing water for local property owners.

The business is still owned and operated by Mr Hill.

Through word of mouth and expertise, Bungendore Water Bores expanded to cover the Southern Highlands, Southern NSW and Sydney regional areas.

We are committed to sustainable practices and use only modern, environmentally efficient drill rigs and equipment.

Be water wise with Watermin

A WATER bore takes up only a small amount of space and because the water is stored underground, quite often it is not necessary to purchase storage facilities, saving the landowner a lot of money.

These combined factors make a water bore an ideal means of obtaining a permanent supply of water with free underground storage.

The advantages of being underground mean that bore water does not evaporate, it is not easily polluted, it is not

dependant on local rainfall to replenish the supply, there are no local council water restrictions or fees and bore water remains at a cool temperature.

To acquire a bore you will first need to apply for a water bore licence. Phone our office, or call in and see one of our experienced and friendly staff who will assist you with the paperwork to obtain a licence.

Watermin Drillers are a family owned and run business, who have been drilling water bores for over

50 years. Watermin has a wealth of experience, and an extensive data base of information from which to draw.

We carry out on-site inspections to offer a complete service.

Cleaning out an existing water bore is also a part of our complete service.

Pump testing is another option available upon request, to see what your current bore yields.

Watermin can also design and install your geothermal air conditioning systems.

Erase that patchy-looking lawn!

Soft and green: Keeping it Green can transform your lawn into something to be proud of. An award-winning garden is an attainable and beautiful attraction for any home, regardless of its location or size.

Keeping It Green is a family run Canberra business. With a highly trusted name in synthetic grass supply and installation in Canberra and surrounding areas. We have products that will suit any budget or taste. Keeping It Green's exclusive synthetic grasses are 100 per cent Australian made, low maintenance and are UV stabilised for Australian conditions.

Lessen muddy footprints from the two-legged or four-legged family member being trampled through the house - the reasons to give Keeping It Green a call are as endless as the green of their grass.

For more information, call David or Nancy Barnes on **6242 0260 or 0410 081 771** or visit www.keepingitgreen.com.au
