

# Prepare your HOME for WINTER

# Reduce your heating use Supergas can do!

HEATING is a large part of your energy account, yet there are many simple ways of reducing the cost. By following these top heating tips, you're well on your way to a toasty, warmer winter.

\* Every degree can reduce your costs by 10 per cent. If you need to heat your home set your thermostat to between 18° and 20° C.

\* With the use of good insulation in your roof, walls and floors you can save up to \$100 every year.

\* Install double glazed windows.

\* Close off areas being heated.

\* Block off chimneys when not in use.

\* Use time switches to provide heating when required.

\* Installing good-quality and well-fitted curtains with pelmets and blinds can save you up to 10% on your heating bills.

\* Instead of heating the entire bedroom, use an electric blanket just to warm up the bed.

\* Cracks and gaps in houses can account for 10 - 15% of heat loss. Save energy by sealing up gaps and install draught excluders under doors, soft rubber weather strips around windows, and seal around skirting and architraves.

\* On sunny winter days, take advantage of free warmth by pulling back the curtains and letting the sun through the windows.

SUPAGAS is a 100 per cent Australian owned company and has been operating since 1997. With offices across NSW and QLD, Supagas expanded to Canberra in 2011, where we were based in Fyshwick. We relocated to Queanbeyan in 2012 in order to better service

our customers with all their gas needs.

Supagas has an extensive range of gases including Heatagas, gas for balloons, hospitality gases, industrial gases, LPG, welding and specialty gases.

Our domestic 45KG 1p Gas

bottles are the perfect solution for all your household needs, including: heating, cooking and hot water systems.

Supagas has a "YES WE CAN" philosophy, which means we will ensure that you get quality service every time.
