

# Regional Imaging

Comprehensive care. Uncompromising quality.

# Committed to health care

## New look, new logo for Regional Imaging centres

PATIENTS visiting Regional Imaging in Griffith or Wagga for their medical imaging studies are being greeted by a whole new look and feel at the premier imaging facility.

It's not just the bright new logo, but the up-front commitment to "comprehensive care and uncompromising quality" that is catching attention.

Regional Imaging manager Matthew Bellairs said Regional Imaging was focused on providing the very best in quality diagnostic services.

"All staff are happy to see that commitment included in the new logo," he said.

"Our new look is not just a logo change, it represents our relationships both within the local community and the wider IMED Network and the importance that Regional Imaging places on quality service."

The new logo image can be interpreted as symbolising the patient, the referring doctor and Regional Imaging all working together to find the right answer.

The "huddle" as staff refer to the logo, symbolises the strong relationships and the importance of the healthcare team working together to achieve best patient outcome.

It also identifies Regional Imaging as a member of the national IMED Radiology Network.

**NEW LOOK:** The team at Regional Imaging is committed to comprehensive care and uncompromising quality. From left: Carla Brewer, sonographer and nuclear medicine technologist, Wendy Protheroe, medical typist, Leeanne Guliellini, administration supervisor, Leah Croce, receptionist, Leah Blenkiron, receptionist, Sean Williams, supervising sonographer, Julie Hunt, enrolled nurse, Mark DeValentin, radiographer and Dr Ali Kyatt, radiologist.

**Proud to help grow local business for over ninety years.**

## Providing caring, expert service

REGIONAL Imaging has been providing medical imaging services in Griffith for over 25 years.

As the name suggests, Regional Imaging is focused on providing the very best quality medical imaging service with clinics across regional Australia located in major centres of southern New South Wales, northern and eastern Victoria, Tasmania and the Northern Territory.

Regional Imaging offers CT, ultrasound, mammography, interventional procedures and nuclear medicine in Griffith and for residents who travel to their Wagga clinic for MRI. All Medicare eligible scans are bulk billed.

The Regional Imaging team takes great pride in providing patients with a caring, professional and clinically superior service. They do that by recruiting world-class radiologists and talented and compassionate staff, investing in state-of-the-art technology and in the development of an unparalleled digital network.

As a patient, you will receive individual

**TOP NOTCH:** Regional Imaging is focused on providing the very best quality medical imaging service.

ual attention and will be treated with respect, dignity and professional care.

You will be offered same/next day appointments and you and your referring doctor will be provided with the

answers you need as quickly as possible, regardless of your ability to contribute to the cost of your health care needs.

As a referring medical practitioner you can be assured that Regional Imaging will respond rapidly to your needs with fast turnaround of reports and priority service for your urgent patients. Regional Imaging has the latest imaging technology, optimising diagnostic accuracy and efficiency.

Radiologist Dr Ali Kyatt is on site and highly experienced with a significant reputation within his field of expertise.

Through IMED Online, referring medical practitioners are able to view images online with patients during consultation and also with Dr Kyatt or other specialists in metropolitan areas, all in real time 24/7.

Locally based technical staff are able to network with colleagues across Australia, ensuring that while they may live and work in Griffith, they are kept up-to-date professionally through networking with their peers.

## Specialists on site for prompt, skilled service

THE beauty of Regional Imaging is that specialists are on site.

Regional Imaging is the only imaging service provider in Griffith with a full clinical team onsite locally as opposed to relying on remote access.

Specialist radiologist Dr Ali Kyatt is available in the department to advise GPs and to perform complex interventional procedures promptly when needed for both public and private patients in Griffith.

Dr Kyatt's subspecialty qualifications include musculoskeletal and interventional imaging, ensuring Griffith regional patients receive the very best outcomes from the first diagnostic ultrasound or CT scan through to procedure planning for pain relieving CT-guided injections or skilled biopsy of suspicious lumps.

Dr Kyatt has been warmly welcomed into the Griffith specialist medical community. It is very important to have access to skilled specialists locally, rather than only by remote access.

On-site specialists like Dr Kyatt are able to provide hands-on emergency services and guidance to general practitioners and hospital emergency doctors, significantly improving patient outcomes.

**ON HAND:** Specialist radiologist Dr Ali Kyatt is available on site at Regional Imaging, eliminating the need for patients to travel for the best outcomes from start to finish.

### A network of expertise

THE I-MED Network is Australia's largest private medical imaging network, covering all major metropolitan areas and significant parts of rural and regional Australia.

As a member of the I-MED Radiology Network, patients and referrers can be confident knowing that Regional Imaging provides only local staff that understand local issues and who can access a national support network, ensuring best practice at all times.

Across Australia, the I-MED Network operates 200 clinics and performs more than four million patient procedures each year, making them one of the largest providers of medical imaging in the world.

With over 350 specialist radiologists, 50 nuclear physicians and 3900 staff actively sharing clinical knowledge and expertise, a consistently high level of service is assured across all clinics.

I-MED is committed to providing an uncompromising quality of service to its referrers and patients by offering comprehensive imaging services in all modalities of this increasingly expanding branch of diagnostic medicine.

**'It's helping your doctor find the answer'**
