

Winter Warmers

Arrow inbuilt wood heater

Boston's Betta Home Living, Adelong

BOSTON'S of Adelong has been a trusted name for 90 years and is your go-to centre for great advice and great deals on wood and gas heater options this winter.

Owner and operator of Boston's Betta Home Living for the past three-and-a-half years Shane Salmon and his friendly team can advise you on the best type of heater for your home in terms of efficiency and output.

"We provide free quotes within a 100km radius, or if you want to give us a sketch or dimensions

we can quote off the plan," Shane said.

"We also provide fluing options, and can arrange most heater installations."

With a range of trusted wood heater and natural or LPG gas heater options from Arrow, Heat Charm, The Settler Range, Connara and Scandia, Boston's Betta Home Living gives you a great choice along with great service.

Visit Boston's Betta Home Living today at 69 Tumut Street, Adelong, or phone for more information on 6946 2024.

Harrison & Higgins, Wagga Wagga

FOR over 20 years, Harrison & Higgins has provided comfort to residents and businesses through Wagga's hot summers and frosty cold winters.

Harrison & Higgins realises that no single heating or cooling unit will suit every application, which is why they provide customised heating and cooling solutions for new and existing homes and businesses.

Trust Harrison & Higgins to fully advise you on the best, most economical and environmentally friendly system to suit your requirements.

Harrison & Higgins offers:

- Free assessments and a comprehensive no-obligation quote

- Quality products and workmanship by professional and experienced technicians
- Back-up service and repairs for all installations. Contact Harrison & Higgins today on 6925 3844 for a free quote and local expertise you can count on.

STOP PRESS! Come and see the latest heating technology at Harrison & Higgins! The new Braemar six-star range is the first in the world to break the six-star barrier! When you consider each additional star equates to 10 to 15 per cent in savings, that's great news not only for your gas bills, but also for the environment.

Braemar's "Super-Six" ducted gas heater brings you energy efficiency and savings that are out of this world, but won't cost the earth!

Savings per year (running costs) 4, 5, 6 star and "Super-Six" ducted gas heaters vs 3 star*

Installing a "Super-Six" instead of a three star ducted gas heater will save approximately \$463 per year in running costs!

Heat your home with wheat – that's right, wheat!

FUEL and labour costs for home heating can be at least halved this winter by using wheat as fuel instead of wood.

The innovative American bio-fuel slow combustion "Wheater" so impressed fifth-generation Coolamon cropping farmers Ivan and Alexis Furner that they have now become agents for them.

"We live in a turn-of-the-century six-bedroom Federation-style home with 11 foot ceilings," said Mr Furner.

"The home was originally built with the aim of keeping out the sun more than the cold."

"The insulating properties of this type of concrete are zero, and with six-inch thick walls and no cavity for insulation, our house has until now always been cold."

Heating methods including wood, electricity and gas were inefficient while only raising the temperature in the home marginally. Last winter the Furners started using the "Wheater" and said their house was the warmest it had ever been.

"The Wheater was able to burn 24 hours a day, seven days a week

at a constant heat," Mr Furner said.

The heating system was also more economically constant. In a cost analysis typical heating costs for seven tonnes of wood at \$150 a tonne was compared to two tonnes of wheat totalling \$560.

Wheat is cheaper than natural gas, LPG, oil and electricity. A tonne of wheat will cost about \$280 farm gate,

and an average Wheater provides a range of 8000 to 30,000Btu of heat, burning about 15 to 20kg of wheat per day, needing its hopper topped up only once in 24 hours.

Wheat heaters offer minimal smoke, ash or maintenance cleaning, providing the ambience of wood heating without the effort of collecting, cutting or splitting firewood. They can run

on most grains or pelletised product, compressed waste and newspapers – even cherry seeds – providing it has less than 11 per cent moisture.

The technology was only introduced into Australia in November 2011, but has been successfully used in the United States for at least 30 years, with corn typically being used there.

INTRODUCING BIO MASS HEATING

WHEAT HEATERS

The most efficient space heater in Australia.

- 97% burn efficiency compared to approximately 60% for most wood heaters.
- Easy to use. Only takes around 5 minutes per day Burns 24/7
- Low carbon heating
- Heats up to 25 squares (2400sqm)
- One metre of wood = \$120 vs 250kg wheat (\$50-\$70) in a multi-fuel pellet heater
