THE LAND

Specifications

Cattle Must be HGP FREE

The objective of this trial is to evaluate the performance of teams of five animals in achieving the commercial requirements of Teys Australia's Jindalee Feedlot grain fed beef program (targeting the branded products of Riverine Premium Beef, Teys Certified Premium Black Angus and Riverine Classic Beef).

Entrants will be evaluated on their ability to supply steers that meet feedlot entry specifications, perform well in the feedlot and produce high yielding, good eating quality carcasses that meet the market specifications.

Feedlot Feeder Entry Specifications – 20 points/animal (100 points/team)

Animals will be assessed at induction to determine how successfully they meet the feedlot feeder entry specifications. Animals will receive maximum points if they are within the range of specifications. Animals that fall outside the specifications will have points deducted.

The feeder entry specifications are:

• Breed	most breeds and crosses accepted (maximum of 50% Bos indicus content)
• Sex	steers only
• Live weight (shrunk)	360-480 kg
• P8 fat (scanned)	3-10 mm
• Dentition	milk tooth only
• Frame score	4 to 6
• Vaccination	One shot of Bovilis-MH + IBR prior to August 10

Points will be deducted for incomplete National LPA Vendor Declarations and cattle consigned from an incorrect PIC number on the NLIS database.

Feedlot Performance – 70 points/animal (350 points/team)

Feedlot performance will be assessed based on the average daily weight gain (ADG) of each animal and the health of each animal. Animals with higher rates of gain will be awarded higher points, while points will be deducted for animals that require treatment for illness or deaths.

Carcase Specifications – 110 points/animal (550 points/team)

Carcasses will be assessed on their meeting the carcass specifications for Teys Australia's Jindalee Feedlot grain fed beef (targeting the branded products of Riverine Premium Beef, Teys Certified Premium Black Angus and Riverine Classic). Carcasses will receive higher points if they are within the optimum range of specifications and zero points for each trait that falls outside specifications.

The carcass specifications are:

• Hot standard carcass weight (HSCW)	330-420 kg, optimum 370-400 kg
• P8 fat	10-32 mm, optimum 12-20 mm
• Dentition	0-4, optimum 0-2
• Marbling	Aus-meat 1-9, optimum 2+ (MSA marble 400)
• Meat colour	Aus-meat 1A-3, optimum 1B-1C
• Fat colour	Aus-meat 0-3, optimum 0-1
• Meat pH	5.30-5.69

Points will be allocated for the dressing percentage, yield of saleable meat and the eating quality of each carcass, with higher points allocated for higher performing carcasses.

Overall Point Score – 200 points/animal (1000 points/team)

Individual animals will be assessed and feedback provided to entrants on the performance of each animal in the above areas. Prizes will be awarded based on the performance of the teams of five. Should an animal die in the feedlot, the cause of the death will be investigated. If the death is found to be accidental then allowances will be made for that animal/team, however any other deaths will result in zero points for feedlot performance and carcass specifications for the animal.

FEEDBACK TRIAL

Cattle Nomination Form

Exhibitor Name:

TEAM ONE

Breeder tag	Breed or Cross	Electronic ID (RFID) eg. 951 0000 12345678	Month of Birth.....	NLIS Number eg. NB 123456LBE01001
1.....			or

FEEDBACK TRIAL

Cattle Enter Feedlot: Wednesday August 25

[illegible]

Cattle Entry

Cattle will be entered on Wednesday August 26 (Remember cattle will be trucked the night before).

Each exhibitor will be sent a management Tag with the numbers 1-5 and a team number on them. This is to allow ease of sorting as they come off trucks at the feedlot. If the Tags that we send out are not used points will be deducted accordingly. These Tags need to be married up with the cattle nomination NLIS or RFID you nominate

Field Day

A mid-term field day will be held for you to view your cattle after 80 days on feed at Teys Australia's Jindalee Feedlot, with speakers from Australia's leading feedlot and Agricultural businesses.

Presentation Night

A presentation dinner will be held End of January, 2022 in Wagga Wagga, where winners will be announced, awards presented and you will receive a 50+ page bound document with all the feedback comparisons of cattle in the trial from each exhibitor.

Summary of Point Breakdown per animal

Induction Entry Weight 360 to 480kg

	Points per animal
Live Weight (shrunk)	10
P8 fat (scanned)	5
Frame score	5
Dentition	penalties applied if not milk teeth (-5)
NVD	penalties applied if not complete correctly (-5)
Bovlis MH + IBR validation	penalties apply if not sent in with cattle nomination form (-5)
Consigned PIC	penalties applied if consigned PIC not correct (-10)
Total	20

Feedlot Performance

	Points per animal
Average Daily Gain	70
Health treatments	penalties applied for each treatment (-5)
Total	70

Carcase

	Points per animal
Carcase weight	20
Dressing %	15
P8 fat	10
Rib fat	-
Dentition	penalties applied if not milk or 2 teeth
Meat colour	5
Fat colour	5
Saleable meat yield	25
Marbling	15
Meat quality	15
Total	110

Overall total points per animal - 200

Overall total points per team - 1000
