

ONE WORLD sustainability

Environmental sustainability involves making decisions and taking action that are in the interests of protecting the natural world, with particular emphasis on preserving the capability of the environment to support human life. It is an important topic at the present time, as people are realising the full impact that businesses and individuals can have on the environment.

Environmental sustainability is about making responsible decisions that will reduce your business' negative impact on the environment. It is not simply about reducing the amount of waste you produce or using less energy, but is

concerned with developing processes that will lead to businesses becoming completely sustainable in the future.

Currently, environmental sustainability is a topical issue that receives plenty of attention from the media and from different governmental departments. This is a result of the amount of research going into assessing the impact that human activity can have on the environment. Although the long term implications of this serious issue are not yet fully understood, it is generally agreed that the risk is high enough to merit an immediate response.

NEED TO GET OUT MORE?
Discover Wollondilly's

Farmers are welcome to join our growing network of Fresh Food & Wine. Please contact 0406 237 877

Looking for something to do all year round?

Why not take the Wollondilly Harvest Experience.

You will experience fresh local veggies, lovely crisp apples, peaches, nectarines, bread from a bakery with a difference.

Did you know there is a Barramundi Farm in your region, what a treat. You can get great olives, lavender, wine and beautiful hand made soap. There is a lovely Organic farm on this part of the Farm Gate Trail and you can put your head down there or at Mowbray Park Farm Stays, a very unique experience. Belgenny Farm offers you a peek into farming past. For further details on the Wollondilly Harvest Experience check out our website and order your free Farm Gate Trail Map.

Sustainable Grazing Program

Free or heavily subsidised training workshops, field days and courses to help you improve the productivity and sustainability of your farm.

Workshops and courses include:

Paddock Plants Plus:

- Know how to identify grass species, weeds and other important paddock plants growing on your property
- Learn about indicator species and what they are telling you about your landscape

cost: free (normally \$55)

PROGRAZE™:

- Skills to manage productive and sustainable pastures
- Learn to assess pasture quantity and quality
- Learn how to manage your pastures in order to meet the feed demands of your grazing animals
- Develop grazing strategies which maximise both animal and pasture production and sustainability

cost: \$200 per property (normally \$670)
Includes two free pasture quality tests valued at \$120.

LANDSCAN™:

- Skills to assess farm landscapes, land capability and soils
- Learn how to conduct representative soil sampling
- Understand soil testing and soil test results
- Make informed decisions about nutrient inputs
- Learn how to prevent or manage soil erosion, soil acidity, salinity and other soil degradation issues

cost: \$100 per property (normally \$440)
Includes two free soil tests valued at \$200.

All our courses, field days and workshops are delivered on-farm.

Other workshops, courses and field days include:

- Seasonal Farm Walk • Soil Carbon & Soil Biology
- Landscan™ Farm Plan • Bioscapes
- Managing Your Farm Dam

Free property visits to answer questions about pasture and soil management issues
