

DECISION UP IN THE AIR

Gordon Bradbery:

"I'm waiting to hear from the people who want to play in this space but at the present time I don't have a lot of people banging down my door to take on Skydive the Beach."

Michelle Blicavs:

"This is potentially Gleniffer Brae all over again, and we could potentially be making the same mistake here."

Greg Petty:

"[It is] critical that key public parks... should never be sold off, or leased long term, such that it results in 'privatisation' of public land."

David Brown:

"We need to be a little bit cautious about being seen to be too far in camp with a private player, as much as I think their proposal has got merit."

George Takacs:

"Just because something generates a business opportunity and provides employment, you shouldn't take it for granted that that means it provides a positive benefit."
