

ACT PUBLIC SCHOOL ENROLMENT PROJECTIONS 2013 to 2017

FOR ETD USE ONLY

Executive Summary

The ACT Public School Enrolment Projections 2013-2017 report provides the annual update of student enrolment projections for all ACT public schools for the period 2013 to 2017.

This document is used as a broad guide for internal planning purposes in the Education and Training Directorate (the Directorate).

In line with population growth in the ACT, public school projections indicate that total enrolments are expected to grow at an average of nearly two percent per annum during this period. Areas of growth are Gungahlin in Canberra's north and the new region of Molonglo in the south-west.

SUMMARY OF KEY TRENDS BY SECTOR

There are two sources of growth in the ACT public school system: Greenfield development and urban intensification. Two new schools in Gungahlin, Franklin Early Childhood School and Neville Bonner Primary School opened in 2013 and will address enrolment pressure in the area. The strong actual and forecast population growth in Gungahlin will require the development of new education facilities in the suburbs of Moncrieff and Kenny.

Development in Molonglo will initially lead to pressure on schools in Curtin, Yarralumla and Duffy until Coombs Primary School opens in 2016. In established areas, enrolments will need to be managed due to increased pressure from new urban development. Notably overall numbers of enrolments in ACT schools from residents of New South Wales are expected to increase in line with the developments which are planned in Googong and Tralee.

Table 1 provides an overview of projected public school student enrolments from 2013 to 2017. The growth in student numbers over this period is in line with ACT population growth and is reflected in all age groups.

Table 1: Enrolment Projections 2013 to 2017 for Kindergarten to Year Twelve by Year

School Type	2012*	2013**	2014	2015	2016	2017
Preschool	4159	4264	4513	4503	4532	4587
K-12	35848	36229	38357	39386	40103	40745
Total	40074	40409	42870	43889	44635	45332

^{(1) *}Data from the February School Census 2012. With minor differences due to including students with special needs and a small number of students who attend more than one school.

School capacity

The capacity figures used in this document are for mainstream enrolments only. It is assumed that colleges and high schools accommodate an average of 19 students per teaching space and primary schools accommodate up to an average of 25 students per teaching space (with additional space requirements for special classes). School capacities are managed by the Directorate's Finance and Corporate Support Branch.

Analysis of the capacity of individual schools takes into consideration a range of design factors and specific educational needs. School capacities are periodically reviewed by the Finance and Corporate Support Branch to ensure they reflect changes in building or design arrangements and the operation of special programs in schools, e.g. bi-lingual immersion provision. The figures indicate current capacities and additional accommodation available in transportable classrooms.

Enrolment pressure is created by a number of variables such as new developments within the school catchment, overall population growth, urban regeneration, as well as popularity of the school. Possible solutions to ease enrolment pressure in a school are:

- reducing the proportion of out-of-area enrolments at one or more schools in the area
- providing a temporary or permanent capacity increase (e.g. transportable classrooms)

^{(2) ** 2013} February School Census draft figures.

- adjusting a school's Priority Placement Area (PPA) boundary or
- planning for a new school.

Table 10 shows the approved mainstream capacity of each public school (excluding preschools) with reference to projected enrolments by school.

Methodology

School enrolment projections are based on recent enrolment and demographic trends. These enrolment forecasts incorporate the latest information on school enrolment rates, birth rates and other factors. At the whole of ACT level, the population projections incorporate the Australian Bureau of Statistics Estimated Resident Population figures.

Key data sources used for the projections are:

- ACT public school census data conducted in February each year
- data from the ACT Registrar of Births, Deaths and Marriages on the number of births by suburb
- recent grade to grade retention rates
- estimates of enrolments from any proposed new residential development
- any known Government or Directorate policy or other factors, such as capacity limitations, which influence enrolment levels
- the ACT Population Projections for Suburbs and Districts 2009 to 2059
- ACT Population Projections for Suburbs and Districts: 2001-2021, CMTD (2011)
- ACT Economic Development Directorate August 2012 release of the dwelling occupancies forecasts
- Input from school principals through consultation on the one year enrolment projections.

Table 2: Summary of ACT Estimated Resident Population 0-19 year olds

Age	2012	2013	2014	2015	2016	2017

Total	92100	93300	94400	95400	96700	97750

Specialist Schools / Special Classes in Mainstream Schools

In general, the ratio of public school students with special needs has remained stable between 4.6 - 4.8%. These students are included in the totals for the schools.

Table 3.1: Summary of Special Needs Enrolment Trends

Proportion of special needs students compa	red to eacl	h sector			
	2008	2009	2010	2011	2012
Public Schools	4.6%	4.7%	4.8%	4.7%	4.7%
Independent Schools	1.5%	1.2%	1.6%	1.6%	1.8%

Table 3.2: Special Needs Enrolment Projections in Public Schools

	2012	2013	2014	2015	2016	2017
Special Needs students	1890	2015	2014	2062	2098	2131
Total Public School Population	40074	41743	42870	43889	44635	45332

(1) Includes all students flagged as special needs, including those students not formally assessed at the time of the census. 2012 figures are from the February School Census 2012

Mainstream schools offer a variety of special classes to students with a disability. The classes include a range of units each having a specific maximum size. Units include:

- learning support centre (LSC)
- learning support unit (LSU)
- learning support units autism (LSUA)
- support class language (SCL)
- hearing impaired unit (HIU)
- vision support (ITVI).

Cranleigh and Malkara Schools are specialist primary schools for students with a moderate to profound intellectual disability, or Autism Spectrum Disorder who require intensive levels of support. The Woden School is a specialist setting for students in years 7 to 12 students with an intellectual disability or Autism Spectrum Disorder. Black Mountain School offers programs for students in years 7 to 12 with a moderate to profound intellectual disability or Autism Spectrum Disorder requiring intensive levels of support. Turner School operates as a primary school with a predominant enrolment of mainstream students and a substantial enrolment of students with disabilities. Students who access the Disability Education program at Turner meet the ACT criteria for intellectual disability or Autism Spectrum Disorder.

ENROLMENT PROJECTION HIGHLIGHTS BY SCHOOL NETWORK AND DISTRICT

Table 4: Kindergarten to Year 12 Projections by Network 2013 – 2017 and Total Capacity

^{(1) *}Data from the February School Census 2012. With minor differences due to including students with special needs and a small number of students who attend more than one school.

NETWORK MODEL

ACT public schools are administratively grouped into four school networks. The following is a description of the trends evident within each the school networks, with reference to tables 6-9.

NORTH/GUNGAHLIN SCHOOLS NETWORK

Enrolments for the North/Gungahlin network are projected to grow at the fastest rate in the ACT over the five years of the projection period. Growth can be attributed to the continued development of suburbs such as Casey, Crace, Franklin, Bonner and Forde, in addition to inner northern urban infill development on the edge of Watson. Growth patterns are also affected by urban infill in Lyneham, Braddon and the city centre. Long term growth is expected based on demand driven by continuing and future developments. Development plans

for the additional suburbs of Kenny, Moncrieff and Taylor in northeast Gungahlin will see increased demand for school enrolment places in the North/Gungahlin network. Within the 2013-2017 projection period, there is expected, to be a high demand for high school places in line with the network's demographic profile, however there will continue to be growth in the primary sector. The forecasted demand pressures identified within the public high school sector may be relieved by the expected expansion in the non-government school sector. There is expected to be pressure on schools from growth in Palmerston, Crace, Amaroo and Harrison.

BELCONNEN SCHOOL NETWORK

The Belconnen network is anticipated to be the second fastest growing network over the period of these projections, with addition demand primarily driven by new development in West Belconnen and Lawson. There is expected to be enrolment pressure for Aranda Primary school from infill in Belconnen, Bruce and the Lawson development. The comparative growth in demand for the College sector may reflect the higher retention rates of students due to the *Education, Participation (Enrolment and Attendance)* legislation. In addition to the new housing developments in Macgregor and Lawson, a younger family demographic is likely to regenerate the Belconnen area and contribute to an overall predicted growth of 629 enrolments into the primary school sector over the projection period. It is anticipated that the overall demand for preschool places will also increase due to strong birth patterns in Belconnen.

SOUTH/WESTON SCHOOLS NETWORK

Enrolments in the South/Weston schools network will increase steadily, in-line with relatively stable estimates of population growth over the period of the enrolment projections. Within this network, the development of the new suburbs of North Weston, Wright and Coombs will contribute to the third highest level of growth in the ACT. The impact of the Molonglo development will initially increase pressure on nearby schools that will be mitigated with the opening of Coombs Primary School in 2016. In line with the demographic profile of the new Molonglo suburbs, demand will trend toward primary school enrolments until 2016 with the South/Weston schools network experiencing greater high school demand during the later years of the projection cycle. Apartment developments in the inner south suburbs of Barton, Kingston and Deakin and the regeneration of the Narrabundah area will continue to create demand at Forrest Primary School, Red Hill Primary School and Narrabundah Early Childhood School. Regeneration and infill developments in Phillip and Lyons have contributed to Garran Primary School experiencing high growth in demand. Pressure on Canberra College will continue to increase until around 2020 when a new college is planned to be built in the Molonglo Group Centre.

TUGGERANONG SCHOOLS NETWORK

The Directorate's enrolment projection models predict relatively stable school age population across the Tuggeranong network, trending toward a small decrease after peaking in 2013-14 in line with the *ACT Population Projections for Suburbs and Districts: 2001-2021*, CMTD (2011). Overall, enrolment projections for the college and high school sectors continue to experience a decline, consistent with demographic trends for this age group. Planned development in Greenway will contribute to demand and growth at Namadgi School. The stabilisation of birth rates in Tuggeranong has seen small increases in southern Tuggeranong early childhood and primary schools. Enrolment projections for individual schools increased or decreased with little discernible correlation to the geographic or demographic characteristics corresponding to their Priority Placement Areas.

⁽¹⁾ This table shows the enrolment projections for kindergarten to year twelve and does not include preschool. The capacity figures do not take into account preschool

⁽²⁾ The enrolments projections include special students

⁽³⁾ Special schools have no official capacity

⁽⁴⁾ At this point of time there is no capacity listed for Coombs which is projected to open in 2016

⁽⁵⁾ The Secondary Introductory English Centre (IEC) is located at Dickson College - it also has a college component

ACT EDUCATION AND TRAINING DIRECTORATE USE ONLY

- (6) Connect10 programs are located at Dickson, Lake Tuggeranong and Lake Ginninderra Colleges
- (7) Year 6 students attending the Gold Creek School are accommodated at the senior site
- (8) Harrison School and Namadgi School high school component will not be fully open in 2013
- (9) Taylor Primary School is temporarily operating from the Namadgi School site
- (10) Narrabundah, Southern Cross, Lyons and Franklin Early Childhood Schools are from preschool to year two
- (11) Proposed development may increase demand for preschool in certain areas
- (12) Jervis Bay School projections may change depending on Navy and Australian Federal Police postings which impact enrolments from year to year
